REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: applicant's arguments on page 8 of the response filed 18 April 2005 are agreed with. As for claims 55 and 61, the prior art does not show that receiving the data comprises receiving data to be written to the memory by direct memory access. While DMA is a very well known concept, it does not appear that such a limitation would have been obvious in combination with the other limitations in the claim.

2. As for claims 56 and 59, the prior art does not show that sending the one or more data packets comprises sending the data packets over a selected lane through a packet-switched network, and wherein sending the interrupt packet comprises sending the interrupt packet over the selected lane following the data packets.

3. As for claim 57, the prior art does not show that the interrupt processor is operative to receive a cause of the interrupt from the peripheral device, and to incorporate the cause in the interrupt packet.

4. As for claim 58, the prior art does not show that the interrupt processor is adapted to send the interrupt packet after receiving an acknowledgment from the memory that the data have been written thereto.

5. As for claims 60 and 62 the prior art does not show that the switched serial connection is part of a switching fabric.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
